AL MANARATAIN

AL MANARATAIN COMPANY AND ALI AL SHAAB GROUP W.L.L.

47 Years on the island, Al Manaratain has successfully paved the road to excellence in service and quality products – concrete blocks, interlock paving, artificial stones, readymix concrete, pre-cast concrete, washed sand and crusher products.

ARTIFICIAL STONES

Edging

Brick Edging

Each piece contains seven neatly laid bricks in line, simple to lay, easy to handle, cut to the perfect size. It makes a perfect raised edge to flower beds, paths and drive ways.

Chamfered Brick Edging

This extremely versatile wedge shape gives a choice of either sloping or straight face. It always adds another dimension of visual interest, from edging of paths, borders and lawns or a sloping margin for ornamental pools.

▲ Straight

▲ Curved

Tile on Edge Available in curved and straight options for greater flexibility, with matching corner units.

Stone Edging

Recreation of the traditional look of a craftsman-built, dry stone wall. It has the appearance of natural stones set on edge and mortared in place to give a charming gravel border look to pathways, gravel drives and flower beds.

Rope-Top Edging

Available in straight and curved edging with matching corner units.

1.50 m \varnothing circular flower bed requires 9 curved edging pieces. Rope-top edgings are used in traditional settings.

Old Town Paving

▲ Circle

▲ Sun Circle

Old town circle offers a choice of easy-to-create design features using Bradstone's wide range of compatible components. Large or small circles can be built as stand alone features or may be squared up.

Paving

Corinium

With Corinium you can create intricate patterns. Its rectangular grids, quarter circles, swirls, arcs or straight lines add a professional designers touch to your garden.

Fellside

Fellside is a wonderful way to achieve the crazy paving effect often found in informal cottage-style gardens. Its standard paving size makes it simple and fast to lay.

Hexagonal

Hexagonal Paving gives a natural stone finish in hexagonal shape. It is a good choice for any garden, patio, walkways and swimming pool deck.

Riven Bradstone

Riven paving is ideal for creating a special effect in many different garden features like the patio, terrace, walkways. Our riven paving has the stratified surface and slightly irregular sawn edge of natural stone and comes in different shades each with its own distinct character.

Old Cathedral

Cathedral flagstones feature a subtle hewn surface with random tooled markings, reminiscent of timeworn stone paving. Adding to the authentic effect is the subtle blend of shades and four sizes used.

Stepping Stone

▲ Log Sleeper

▲ Log Stepping stone

Stepping Stone

Stepping stones add a whimsical note and are practical. They are ideal for creating winding paths across gravel, bark, soil or lawn.

Wall Tiles

Available in five different sizes, placed coursed or randomly. Coursed tiles are single course height, and randomized tiles can be laid in various ways to give a rugged stone look.

Walling

Cots wall

It consists of eight single smaller blocks, which build quickly and easily into a range of attractive garden features. A vast variety in colors and sizes makes it suitable for building features like, raised beds, planters etc.

Hadrian wall

Based on a block with two attractive rough textured stone faces, instead of one, this double sided wall works well either with concealed mortar or fully painted for a dry-stone look.

Madoc wall

Madoc walling captures the beauty of slate and is an easy build walling block. The authentic appearance of dry laid, natural slate is achieved by reproducing the profiles of a number of stones in a single, easy to handle, "z" shaped Madoc block.

CONCRETE BLOCKS

Hollow Block

We are the largest producers of blocks on the island and produce a variety of concrete blocks in our three automated plants. We are manufacturing the blocks in accordance with the British Standards by using Sulfate Resistant Cement, Double Washed Sand, Washed Aggregate and sweet water.

Insulation Block

This cellular material has low weight and comparatively high standard, immune to water, moisture and most chemicals. Its low K-value makes it an excellent thermal insulation material, with low water absorption.

Decorative Block

This truly versatile product is suitable for both exterior and interior use. Its economical life cycle and insulating properties are an advantage over other building materials. These blocks are manufactured in a range of colours and shapes - Split, Fluted and Ribbed.

Light Weight Block

Light Weight blocks are the most multi-faceted of all construction blocks: baked expanded clay and 40% enclosed air integrated in a concrete skeleton. They provide the best balance of lightness, strength, thermal and acoustic insulation and also provide high fire resistance and exemplary life expectancy.

CRUSHER PRODUCTS

Being one of the oldest crusher businesses in Bahrain, we added new crusher plant to increase the production capacity of various products like, 5mm, 10mm, 20mm aggregate, 6" stone, local dust, desert fill etc.

INTERLOCKING PAVING

Paving Block

Wide range of paving blocks are manufactured in different shapes, sizes and colours namely rectangular paving, Uni-paving, Uni-decor, Cobble stone, I-shape etc.

3D paving

The 3D Paving block is an attractive form with its illusionary effect, where the light and shadow transforms the block surface into 3-D objects.

Fan Type

An exclusive paving with a wide range of colours are used in major projects.

Quadro paving

Quadro paving gives endless possibilities of design and pattern in unique designs and colors, blends in harmoniously adding beauty to modern architecture or traditional homes. Quadro is the most economical and flexible paving block.

Paving Slab

Suitable for walkways, lawns, patio etc., and available in different attractive colours.

WASHED SAND

With a 75,000 US Gallon Water Purification Plant on accessory on both our sides at Tashan and Eker, we have the capacity to carry out the operation for producing 150,000 gallons of purified water for all sand and aggregate washing operations and concrete production.

READY MIX CONCRETE

Our plant is fully computerised with six separate aggregate and sand storage bins and two separate cement silos for OPC & SRC cements. The production is properly monitored and controlled, to comply with the specifications in respect of quality and quantity.

PRECAST CONCRETE

T- Beam & Block Slab

The Al Manaratain Flooring System combines pre-stressed concrete T-Beams and Infill blocks with compressive strength of 7.0 N/mm². Together these result in a highly efficient and cost-effective flooring system. This eliminates the need for skilled labour because of its simplicity and ease of installation.

INSULATED SLAB

Pre-stressed Insulated Slabs are cast on specially designed pre-stressing beds. As structural elements, these slabs are superior building products. They are superior not alone by virtue of their engineered designing, but by virtue of their simplicity and precision quality.
